AMRTUR CORPORATION SDN. BHD	1	12051

Source: WIPO statistics database. Last updated : 05/2013

The statistics are based on data collected from IP offices or extracted from the PATSTAT database (for statistics by field of technology). Data might be missing for some years and offices or may be incomplete for some origins. The data relating to population and gross domestic product (GDP) are from the UN Statistics Division and the World Bank.

A resident filing refers to an application filed in the country by its own resident; whereas a non-resident filing refers to the one filed by a foreign applicant. An abroad filing refers to an application filed by this country's resident at a foreign office.

Where an office provides total filings without breaking them down into resident and non-resident filings, WIPO divides the total count using the historical share of resident filings at that office.

IP filings and Economy lists patent, trademark and industrial design filings worldwide by applicants from this country (resident + abroad).

One filing at the Eurasian Patent Organization (EAPO), the African Intellectual Property Organization (OAPI), the Benelux Office for Intellectual Property (BOIP) or the Office for Harmonization in the Internal Market (OHIM) is treated as equivalent of multiple abroad filings at each member state; whereas one filing at the European Patent Office (EPO) or the African Regional Intellectual Property Organization (ARIPO) is counted as one abroad filing due to lack of information on designation.

Source: WIPO statistics database. Last updated : 05/2013

The statistics are based on data collected from IP offices or extracted from the PATSTAT database (for statistics by field of technology). Data might be missing for some years and offices or may be incomplete for some origins. The data relating to population and gross domestic product (GDP) are from the UN Statistics Division and the World Bank.

A resident filing refers to an application filed in the country by its own resident; whereas a non-resident filing refers to the one filed by a foreign applicant. An abroad filing refers to an application filed by this country's resident at a foreign office.

Where an office provides total filings without breaking them down into resident and non-resident filings, WIPO divides the total count using the historical share of resident filings at that office.

IP filings and Economy lists patent, trademark and industrial design filings worldwide by applicants from this country (resident + abroad).

One filing at the Eurasian Patent Organization (EAPO), the African Intellectual Property Organization (OAPI), the Benelux Office for Intellectual Property (BOIP) or the Office for Harmonization in the Internal Market (OHIM) is treated as equivalent of multiple abroad filings at each member state; whereas one filing at the European Patent Office (EPO) or the African Regional Intellectual Property Organization (ARIPO) is counted as one abroad filing due to lack of information on designation.

ORTHOPAEDIC INTERNATIONAL,INC.	2	7163

Source: WIPO statistics database. Last updated : 05/2013

The statistics are based on data collected from IP offices or extracted from the PATSTAT database (for statistics by field of technology). Data might be missing for some years and offices or may be incomplete for some origins. The data relating to population and gross domestic product (GDP) are from the UN Statistics Division and the World Bank.

A resident filing refers to an application filed in the country by its own resident; whereas a non-resident filing refers to the one filed by a foreign applicant. An abroad filing refers to an application filed by this country's resident at a foreign office.

Where an office provides total filings without breaking them down into resident and non-resident filings, WIPO divides the total count using the historical share of resident filings at that office.

IP filings and Economy lists patent, trademark and industrial design filings worldwide by applicants from this country (resident + abroad).

One filing at the Eurasian Patent Organization (EAPO), the African Intellectual Property Organization (OAPI), the Benelux Office for Intellectual Property (BOIP) or the Office for Harmonization in the Internal Market (OHIM) is treated as equivalent of multiple abroad filings at each member state; whereas one filing at the European Patent Office (EPO) or the African Regional Intellectual Property Organization (ARIPO) is counted as one abroad filing due to lack of information on designation.

SINGAPORE

Population (Million): 5.31 (2012) (Rank = 114)

Source: WIPO statistics database. Last updated : 05/2013

The statistics are based on data collected from IP offices or extracted from the PATSTAT database (for statistics by field of technology). Data might be missing for some years and offices or may be incomplete for some origins. The data relating to population and gross domestic product (GDP) are from the UN Statistics Division and the World Bank.

A resident filing refers to an application filed in the country by its own resident; whereas a non-resident filing refers to the one filed by a foreign applicant. An abroad filing refers to an application filed by this country's resident at a foreign office.

Where an office provides total filings without breaking them down into resident and non-resident filings, WIPO divides the total count using the historical share of resident filings at that office.

IP filings and Economy lists patent, trademark and industrial design filings worldwide by applicants from this country (resident + abroad).

One filing at the Eurasian Patent Organization (EAPO), the African Intellectual Property Organization (OAPI), the Benelux Office for Intellectual Property (BOIP) or the Office for Harmonization in the Internal Market (OHIM) is treated as equivalent of multiple abroad filings at each member state; whereas one filing at the European Patent Office (EPO) or the African Regional Intellectual Property Organization (ARIPO) is counted as one abroad filing due to lack of information on designation.

VIETNAM

Population (Million): 88.78 (2012) (Rank = 14)

Gross Domestic Product (Billion US\$) (Constant 2005 US\$ (PPP) : 278.14 (2012)
(Rank = 40)

IP Filings (Resident + Abroad, Including Regional) and Economy

MYLAN GROUP	1	12051
TOSY ROBOTICS JOINT STOCK COMPANY	1	12051

Source: WIPO statistics database. Last updated : 05/2013

The statistics are based on data collected from IP offices or extracted from the PATSTAT database (for statistics by field of technology). Data might be missing for some years and offices or may be incomplete for some origins. The data relating to population and gross domestic product (GDP) are from the UN Statistics Division and the World Bank.

A resident filing refers to an application filed in the country by its own resident; whereas a non-resident filing refers to the one filed by a foreign applicant. An abroad filing refers to an application filed by this country's resident at a foreign office.

Where an office provides total filings without breaking them down into resident and non-resident filings, WIPO divides the total count using the historical share of resident filings at that office.

IP filings and Economy lists patent, trademark and industrial design filings worldwide by applicants from this country (resident + abroad).

One filing at the Eurasian Patent Organization (EAPO), the African Intellectual Property Organization (OAPI), the Benelux Office for Intellectual Property (BOIP) or the Office for Harmonization in the Internal Market (OHIM) is treated as equivalent of multiple abroad filings at each member state; whereas one filing at the European Patent Office (EPO) or the African Regional Intellectual Property Organization (ARIPO) is counted as one abroad filing due to lack of information on designation.
